Faculty Feedback Management System - Deliverable 2

Course: CS3009 - Software Engineering - Spring 2025

Project: Faculty Feedback Management System

Team Members: i221059-i221136-i220868

Submission Date: March 23, 2025

A. Software Requirements Specification (SRS)

1. Functional Requirements

- Faculty and students can register/login.
- Students can submit anonymous feedback.
- Faculty can view submitted feedback.
- Admin can generate basic reports.

2. Non-Functional Requirements

- Product Requirements:
- Responsive and available 24/7.
- Provide confirmation on user actions.

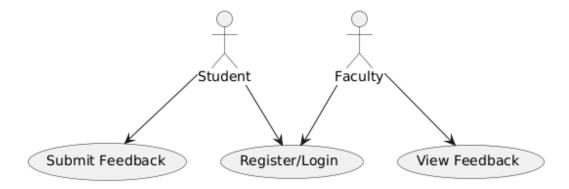

- Organizational Requirements:

- Open-source stack: Java, Spring Boot, MySQL.
- Version control using GitHub.

- External Requirements:

- MySQL 8.0+ and Java 17+ support.
- GDPR compliance for user data.

3. Use Case Diagram

B. User Stories and Conditions

1. Student Registration

- Role: Student

- Goal: Register an account

- Reason: So the student can access the feedback portal securely

- Pre-condition: Student has not registered before

- Post-condition: Student's data is stored in the database

2. Student Login

- Role: Student

- Goal: Login to the system

- Reason: So the student can submit feedback

- Pre-condition: Student has registered

- Post-condition: Student is authenticated and session started

3. Submit Feedback

- Role: Student

- Goal: Submit feedback anonymously

- Reason: To give honest feedback about a course or faculty

- Pre-condition: Student is logged in

- Post-condition: Feedback is saved to the database anonymously

4. Faculty Registration

- Role: Faculty

- Goal: Register an account

- Reason: So the faculty member can view student feedback

- Pre-condition: Faculty is new to the system

- Post-condition: Faculty data is saved in the database

5. Faculty Login

- Role: Faculty

- Goal: Login to the system

- Reason: So the faculty can access their dashboard

- Pre-condition: Faculty has registered

- Post-condition: Faculty session is started

6. View Feedback Reports

- Role: Faculty

- Goal: View feedback submitted by students

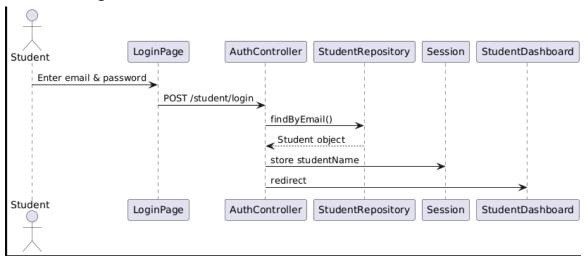

- Reason: To improve teaching based on student feedback

- Pre-condition: Faculty is logged in

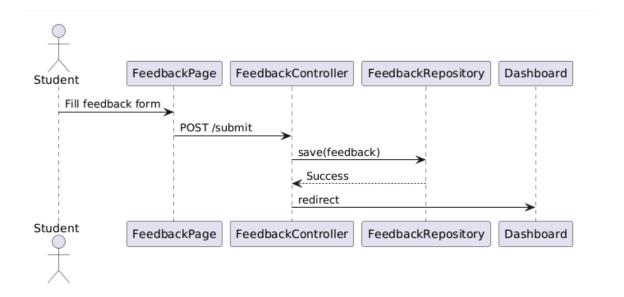

- Post-condition: Feedback entries are retrieved and displayed
